-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 11 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Bruestle. Fig. 1 of Bruestle discloses a turbocharger (1) including a turbine wheel (3) supplied with exhaust gas from an internal combustion engine via at least one supply channel (16), wherein the amount of supplied exhaust gas is controllable via a gas control device (9, 10), which is associated with an actuating device (33) for producing a control movement to be transmitted to the gas control device (9, 10), as well as a transmission device (34) for transmitting the control movement of the actuating device (33) to the gas control device (9, 10). With reference to the limitation “an adjusting device”, such a limitation is considered inherent in the reference, as transmission device 34 of Bruestle could be adjustable, even if via brute force.
3. Claims 11-14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Osborn. Osborn discloses a turbocharger (20) including a turbine wheel (170) supplied with exhaust gas from an internal combustion engine via at least one supply channel (54), wherein the amount of supplied exhaust gas is controllable via a gas control device (Fig. 4), which is associated with an actuating device (86) for producing a control movement to be transmitted to the gas control device (Fig. 4), as well as a transmission device (262) for transmitting the control movement of the actuating device (86) to the gas control device (Fig. 4). With reference to the limitation “an adjusting device”, such a limitation is considered to be disclosed in Osborn at 80 in Fig. 3.

Allowable Subject Matter

4. Claims 15 and 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jinnai, Gartner and Johnson are cited to show the state of the art.
